

Sci-Cool, Inc.

Model SCGP21OW1AF Upright Freezer (shown with optional LCD display)

Sci-Cool's space-saving upright freezer model is ideal for placement beside the work bench, requiring only 6.4 sq. ft. of floor space. This model carries a commercial rating for general laboratory use and comes standard with a manual defrost system that allows you to select the appropriate time for the system to be engaged, unlike auto-defrost models that work on a timer sequence. This product utilizes proven technology used in the household appliance industry, but is manufactured to endure the rigors of commercial laboratory use and carries a warranty for this application. For performance assurance, each unit is completely tested and shipped with its unique pull down performance graph. The exterior is constructed of heavy gauge steel with a baked-on white epoxy coating for long lasting durability and scratch resistance. The interior is white molded ABS with no seams for easy cleaning and decontamination. The interior environment is protected by CFC-free, high-density foamed-in-place urethane insulation. Additional standard features include four fixed refrigerated shelves, a removable wire basket at the floor level for large item storage and two full shelves and five half shelves on the door, an interior light, adjustable temperature control, internal floor drain and adjustable leveling legs. Optional built-in independent LCD digital temperature display available.

Specifications

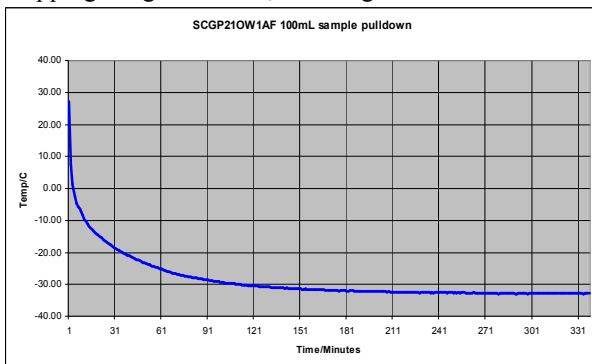

Temperature Range Freezer -28° to -15° C (-18° to 5° F)
